COMMON ENTRAP CE TEST - 2005

DATE	SUBJECT	TIME
03 - 05 - 2005	BIOLOGY	10.30 AM to 11.50 AM
MAXIMUM MARKS	TOTAL DURATION	MAXIMUM TIME FOR ANSWERING
60	80 MINUTES	70 MINUTES

IV	MENTION YOUR	L	QUESTION BO	OKLET DETAILS
	CET NUMBER		VERSION CODE	SERIAL NUMBER
			A-1	084673

IMPORTANT INSTRUCTIONS TO CANDIDATES

(Candidates are advised to read the following instructions carefully, before answering on the OMR answer sheet.)

- 1. Ensure that you have entered your Name and CET Number on the top portion of the OMR answer sheet.
- 2. ENSURE THAT THE TIMING MARKS ON THE OMR ANSWER SHEET ARE NOT DAMAGED / MUTILATED / SPOILED.
- 3. This Question Booklet is issued to you by the invigilator after the 2nd Bell. i.e., after 10.35 a.m.
- 4. Carefully enter the Version Code and Serial Number of this question booklet on the top portion of the OMR answer sheet.
- 5. As answer sheets are designed to suit the Optical Mark Reader (OMR) system, please take special care while filling the entries pertaining to CET Number and Version Code.
- 6. Until the 3rd Bell is rung at 10.40 am.:
 - Do not remove the staple present on the right hand side of this question booklet.
 - Do not look inside this question booklet.
 - Do not start answering on the OMR answer sheet.
- 7. After the 3rd Bell is rung at 10.40 a.m., remove the staple present on the right hand side of this question booklet and start answering on the bottom portion of the OMR answer sheet.
- 8. This question booklet contains 60 questions and each question will have four different options / choices.
- 9. During the subsequent 70 minutes:
 - Read each question carefully.
 - Determine the correct answer from out of the four available options / choices given under each question.
 - Completely darken / shade the relevant circle with a BLUE OR BLACK INK BALLPOINT PEN against the question number on the OMR answer sheet.

CORRECT METHOD OF SHADING THE CIRCLE ON THE OMR SHEET IS AS SHOWN BELOW:

- 10. Please note that:
 - For each correct answer : ONE mark will be awarded.
 - For each wrong answer : QUARTER (1/4) mark will be deducted.
 - If more than one circle is shaded : ONE mark will be deducted.
 - Even a minute unintended ink dot on the OMR sheet will also be recognised and recorded by the scanner. Therefore, avoid multiple markings of any kind.
- 11. Use the space provided on each page of the question booklet for Rough work AND do not use the OMR answer sheet for the same.
- 12. After the last bell is rung at 11.50 a.m., stop writing on the OMR answer sheet.
- 13. Hand over the OMR ANSWER SHEET to the room invigilator as it is.
- 14. After separating and retaining the top sheet (CET Cell Copy), the invigilator will return the bottom sheet replica (Candidate's copy) to you to carry home for self-evaluation.
- 15. Preserve the replica of the OMR answer sheet for a minimum period of One year.

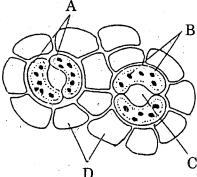

BIOLOGY

1.	Which o	f the following tissue orig	ginates exclusi	vely from the ectoderm of the embryo?
	1)	Epithelial tissue	2)	Muscular tissue
	3)	Connective tissue	4)	Nervous tissue
2.	The pyr		s upright for a	ny ecosystem. This situation indicates th
	1)	Carnivores have a bette	er energy conve	ersion efficiency than herbivores.
,	2)	Producers have the low	est energy con	version efficiency.
,	3)	Herbivores have a bette	er energy conve	ersion efficiency than carnivores.
	4)	Energy conversion effic	iency is the sa	me in all trophic levels.
3.	Gynoeci	um in the members of fa	mily Legumino	sae is composed of
	1)	One carpel	2)	Two carpels
	3)	Three carpels	4)	Five carpels
4.	Identify	from the following, the c	ompound that	links glycolysis and Krebs cycle.
	1)	Pyruvic acid	2)	Oxalo acetic acid
	3)	Acetyl Co-A	4)	Lactic acid
5.	Which p	art of the human brain c	ontrols the bre	athing movements ?
·	1)	Cerebellum	2)	Medulla oblongata
	3)	Cerebrum '	4)	Diencephalon
		(9)	ongo for Rough	Worls

6.		ne chromosome number of a given omologous pairs, the condition is			dditional chro	omosome in one
	1)	Monosomy	2)	Trisomy	•	,
	3)	Nullisomy	.4)	Polyploidy		
7.		n cell in a female gonad and a ge neously, what will be the ratio of				ergoing meiosis
	1)	1:2	2)	1:1	. ,	
	3)	2:1	4)	1:4		,
8.	Soil cons	servation is a practice in which				
	1)	soil is well aerated	•			
•	2)	soil is protected from being carr	ried awa	y by wind an	d water	
	3)	soil erosion is allowed				
'	4)	soil fertility is enhanced				
.9.	The mai	n function of lacteals in the villi o	fhumar	n small intesti	ne is the abso	rption of
	1)	Glucose and vitamins	2)	Amino acids	and glucose	
	3)	Fatty acids and glycerol	4)	Water and m	ineral salts	•
10.	X and a	organism, when viewed under a n eye piece of 10 X magnification n when observed under a dissect leasure	on meas	sured 4000 μ	in length. Th	ne same micro-
	1)	$100~\mu$	2)	40μ	. .	
	3)	$400~\mu$	4)	10 μ		•

11.	Leaf fall	occurs in a tree when there is an	incre	ase in the concentration of
	1)	Auxins	2)	Abscissic acid
	3)	Cytokinins	4)	Gibberellins
12.	Which o		tant, l	nigh yielding breed of poultry developed in
	1)	White leg horn	2)	Aseel
	3)	Plymouth rock	4)	Giriraja
13.	Sertoli c	cells are nourishing cells in the t	estis.	They also secrete a hormone. Identify the
	1)	Testosterone	2)	Gonadotropin
	3)	Inhibin	4)	Relaxin
14.	Molecula	ar biology is concerned with the s	tudy (of
	1)	all aspects of micro organisms	1. ·	
	2)	structure and functions of polyr	ners o	flife
	3)	the chemistry of living organism	ns	
	4)	the process by which molecules form of life.	of che	mical substances organized into primitive
15.		er, darker and harder portion of s cot stem, is called	econd	ary xylem that can not conduct water, in ar
	1)	Bast	2)	Alburnum
	3)	Duramen	4)	Wood

16. The following figure shows the stomatal apparatus. Identify the parts labelled as A, B, C and D

Choose the correct answer from the following.

- 1) A = Subsidiary cells, B = Chloroplasts, C = Stoma, D = Guard cells.
- 2) A = Guard cells, B = Stoma, C = Chloroplasts, D = Subsidiary cells.
- 3) A = Subsidiary cells, B = Stoma, C = Chloroplasts D = Guard cells
- 4) A = Guard cells, B = Chloroplasts, C = Stoma, D = Subsidiary cells
- 17. In which of the following plants, there will be no transpiration?
 - 1) Plants living in deserts
- 2) Aquatic, submerged plants
- 3) Plants growing in hilly regions
- 4) Aquatic plants with floating leaves
- 18. Which of the following groups of algae do not have eukaryotic organization?
 - 1) Blue green algae

- 2) Green algae
- 3) Golden brown algae
- 4) Red algae
- 19. Identify from the following, a hormone produced by the pituitary gland in both males and females but functional only in females.
 - 1) Relaxin

- 2) Vasopressin
- 3) Somatotropic hormone
- 4) Prolactin
- 20. Which one of the following is not a characteristic feature of bryophytes?
 - 1) Filamentous rhizoids
- 2) Dominant gametophytic generation

3) Vascular tissues

4) Amphibious habitat

		A -
21.		ouse effect is the cumulative result of the influences of certain gases. Identify the
	1)	Chloroflurocarbons 2) Methane
•	3)	Carbon dioxide 4) Nitrogen
22.	of scient	I lists some principles, pertaining to physiology of plants. Column II lists the name sists who proposed the idea. Match the two columns. Identify the correct choices given
-	Co	lumn - I Column - II
	Α.	Mass flow hypothesis p. J. C. Bose
	В.	Relay pump theory q. Strasburger
	C.	Transpiration pull theory r. Munch
	D.	Pulsatile movement theory s. Godlewski t. Dixon and Jolly
	1)	A = r; B = s; C = p; D = t 2) $A = r; B = s; C = t; D = p$
	3)	A = s; B = r; C = t; D = p 4) $A = s; B = r; C = p; D = t$
23.	Which o	ne of the following types of silk is being produced extensively in South India?
	1)	Mulberry 2) Eri
	3)	Muga 4) Tussar
24.	Identify	from the following plant parts, the major contributors to human food.
	1)	Root 2) Stem
	3)	Leaves 4) Fruits

Alcohol is the most socially accepted narcotic drug. Excessive consumption of alcohol leads **25.**

1) Loss of Memory

2) State of hallucination

3) Cirrhosis of liver

4) Suppression of brain functions

- **26.** Haemophilia is a condition where there is
 - 1) No production of melanin in the skin
 - 2) No production of haemoglobin in the blood
 - 3) A delay in the clotting of blood
 - 4) A failure in the clotting mechanism of blood
- **27.** Read the statements A and B
 - A) The human small intestine is the longest portion in the alimentary canal
 - B) Absorption of digested food requires a very large surface area

Identify the correct choice on the two statements

- 1) Statements A and B are both correct
- 2) Statement A is correct, B is wrong
- 3) Statement B is correct, A is wrong
- 4) Both the statements are wrong
- 28. In the lac-operon model, lactose molecules function as
 - 1) repressors which bind with the operator gene
 - 2) Inducers which bind with the operator gene
 - 3) Corepressors which bind with the repressor protein
 - 4) Inducers which bind with the repressor protein
- **29.** When a cell of diameter 2 μ grows to double its diameter, what will happen to its surface area volume relationship?
 - 1) It will remain the same
- 2) It will reduce to half

3) It will double

- 4) It can not be determined
- **30.** Which of the following is a genetically dominant trait in human beings?
 - 1) O blood group

- 2) Colour blindness
- 3) Rh+ve blood group
- 4) Albinism

31.	Identify	from the following, a characteristic	pigment associated with chlorophyli-b molecules
	1).	Ferredoxin	2) Plastoquinone
	3)	Plastocyanin	4) Cytochrome
32.		h of the following regions of a r ces, takes place?	ephron does maximum reabsorption of usefu
	. 1)	Glomerulus	2) Henle's loop
	3)	Distal convoluted tubule	4) Proximal convoluted tubule
33.	Which o	f the following statements is true w	rith reference to cross pollination in angiosperms
	1)	It can fail to occur due to distance	ce barrier .
	2)	It requires the production of a la	rge number of pollen grains
	3)	It most often results in high yiel	d of plants
	4)	It occur only in unisexual flower	s
34.	Which o	f the following natural process is	likely to hasten organic evolution?
	1)	Overproduction	2) Favourable environment
. '	3)	Reproductive isolation	4) Abundant genotypic variations
35.	A techn	ology which has found immense u	se in solving cases of disputed parentage, is
• • •	1)	DNA finger printing	2) Polymerase chain reaction
	3)	Recombinant DNA technology	4) Monoclonal antibody production
		(0,, 6)	Dough Worls) *

- 36. Identify from the following, a plant tissue in which lignin does not occur in the cellwalls
 - 1) Sclerenchyma fibers
- 2) Collenchyma

3) Xylem tracheae

- 4) Sclereids
- **37.** Which of the following statement is not true with reference to mitochondria?
 - 1) They contain DNA
 - 2) They divide in synchrony with cell cycle
 - 3) They store and release chemical energy
 - 4) They contain cristae
- **38.** Column I lists the parts of the human brain and column II lists the functions. Match the two columns and identify the correct choice from those given

Column - II

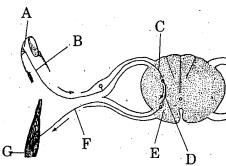

- A. Cerebrum
- B. Cerebellum
- C. Hypothalamus
- D. Midbrain

- p. controls the pituitary
- q. controls vision and hearing
- r. controls the rate of heart beat
- s. seat of intelligence
- t. maintains body posture
- 1) A = s; B = t; C = q; D = p
- 2) A = t; B = s; C = q; D = p
- 3) A = s; B = t; C = p; D = q
- 4) A = t; B = s; C = p; D = q
- 39. The site of EMP pathway of breakdown of glucose in a cell, is
 - 1) Mitochondria

2) Nucleoplasm

3) Peroxysome

- 4) Cytoplasm
- **40.** The following diagram indicates the reflex arc. Identify the parts labelled as A,B,C,D,E,F and G. Choose the correct option.

- 1) A = Sense organ; B = Sensory nerve; C = Ventral horn; D = Interneuron;
 - E = Dorsal horn; F = Motor nerve; G = Effector
- 2) A = Sense organ; B = Sensory nerve; C = Dorsal horn; D = Interneuron;
 - E = Ventral horn; F'= Motor nerve; G = Effector
- 3) A = Effector; B = Motor nerve; C = Ventral horn; D = Interneuron;
 - E = Dorsal horn; F = Sensory nerve, G = Sense organ
- 4) A = Sense organ; B = Motor nerve; C = Dorsal horn; D = Interneuron;
 - E = Ventral horn; F = Sensory nerve; G = Effector

41.	How ma	ny huma	n teeth a	ppear tw	vice during	th	e life span of	an indiv	ridual?	٠.	
	1)	32			2	()	16	•			•
• *	3)	20	•		4	.)	22				
42.					g is compar rvations wi		l with the size be correct?	ze of its l	olastula	and g	astrula
	1)	All the	three will	be of th	e same size	;					
•.	: 2)	Thère is	s a progre	ssive in	crease in si	ze	from zygote	to blastu	ıla to ga	strula	
	3)	Gastrul	a will be	larger, v	vhile zygote	a	nd blastula v	will be of	sames	ize	
	4)	Zygote	will be sn	naller, w	hile blastul	a	and gastrula	will be l	arger.		
	this code 1) 3)	on? TAC '. GUA) ;)	UAC CAU		٩		
44.	Choose	the odd p	air out in	the follo	owing	-					
	1)	Epithel	ium - Ker	atin	2	2)	Areolar con	nective t	issue- c	ollagei	n .
	3)	Muscle	fibre- act	in	. 4	.)	Neuron- me	lanin		•	
45.			ent which ts from so		ssential co	mj	ponent of all	organio	compo	unds,	yet no
	1)	Carbon	2-		2	2)	Nitrogen	•			

46.	How many times a red blood corpuscle will have to pass through the heart in its journey							
•		patic artery to the a	•					
	1)	Only once	•	2)	Two times			
	3)	Four times		4)	Several times			
47.		of limiting factors wa ntist who proposed t		th par	ticular reference to photosynthesis. Identify			
	1)	Weismann		2)	Calvin			
	3)	Blackmann		4)	Emerson			
48.	Osmore	gulation in Paramec	ium is a funct	ion of				
	1)	Trichocysts		2)	Contractile vacuole			
	3)	Cytostome		4)	Cytopyge			
49.		from the following t	the branch of l	oiology	which provides direct evidences in favour			
	1)	Taxonomy		2)	Morphology			
,	3)	Embryology		4)	Palaentology			
50.	Which o	f the following group	ps of cells in t	he ma	le gonad, represent haploid cells?			
	1)	Germinal epithelia	al cells	2)	Spermatogonial cells			
-	3)	Primary spermato	cytes	4)	Secondary spermatocytes			

A -1

51.	A nucleo	some is a portion of the chromoner	na co	ontaining
	· 1)	both DNA and histones	2)	Only histones
	3)	both DNA and RNA	4)	Only DNA
52.	Maximu	m amount of oxygen is exchanged	from	the blood in the
	1)	arteries of the body	2).	capillaries surrounding tissue cells
,	. 3)	capillaries surrounding the alveo	li 4)	left auricle of the heart
53.	Which o	f the following term is used to de	scrib	e the component isolated from a plant, for
	invitro (culturing in the specific medium?		
	1)	Embryoid	2)	Callus
	3)	Explant	4)	Synthetic seeds
54.	If a cell	has twice as much DNA as in a no	rmal	functional cell, it means that the cell
	1)	has completed division	2)	is preparing to divide
	3)	has caesed to function	4)	has reached the end of its lifespan
55.	Apical d	ominance in plants is due to the p	resen	ice of
	• =	Gibberellins in the lateral bud		Cytokinins in the leaf apex
,		Abscissic acid at the shoot tip		Auxins at the shoot tip

56.	Which of	f the following structures are derivatives of the endoderm?
	1)	Muscles and blood
	2)	Alimentary canal and respiratory structures
•	3)	Skin and nerve cord
•	4)	Excretory and reproductive structures
57.	TAG GC	nence of nitrogen bases in a portion of a coding segment of DNA was AAT GCT A. What will be the sequence of nitrogen bases in the corresponding region of the oted mRNA?
•	1)	AAT GCT TAG GCA 2) UUT CGT TUC CGU
	3)	TTA CGA ATC CGT 4) UUA CGA AUC CGU
58.	Which cl	namber of the human heart has the thickest muscular wall?
	1)	Left ventricle 2) Left auricle
,	_3)	Right ventricle 4) Right auricle
59.	Entomol	ogy is concerned with the study of
-	1)	Agricultural practices 2) Formation and properties of soil
	3)	Various aspects of insects 4) Various aspects of human life
60.	Which of	the following is called as a detritivore?
	1)	An animal feeding on a plant
,	2)	An animal feeding on decaying organic matter
	3)	An animal feeding on another animal
	4)	A plant feeding on an animal
